in Perfect Pitch Tester should be able to run in the background Perfect Pitch Tester should have a nice icon Perfect Pitch Tester should be able to run with Python 2.4 or higher Perfect Pitch Tester should be able to run as a standalone application Perfect Pitch Tester should run as an application in Windows XP Perfect Pitch Tester should have no add-ons Perfect Pitch Tester should have an option to reset the program to its original state Perfect Pitch Tester should be able to be updated automatically Perfect Pitch Tester should have a nice title Perfect Pitch Tester should be able to recognize the user profile and settings Perfect Pitch Tester should not be too heavy Perfect Pitch Tester should have a nice sound Perfect Pitch Tester should be able to save the played notes in a file Perfect Pitch Tester should be able to remember the last played file Perfect Pitch Tester should have a version number Perfect Pitch Tester should not have a screen Perfect Pitch Tester should have no menus Perfect Pitch Tester should be able to run in Windows 98 Perfect Pitch Tester should run without Python Perfect Pitch Tester should have a well-

---

This macro is a key signature for notation of all Western and Music scales. The macro comes in three versions: music, note and "digital". The music and note version are generated by using the built-in function 'keymacro'. The digital version is generated by using a custom function that takes a list of musical notes and generate the corresponding digital data. KEYMACRO Music: This macro is a key signature for notation of all Western and Music scales. Using this macro, the music version, you can choose from nine types of key signatures: /C Major /G Major /B Flat Major /E Flat Major /D Flat Major /A Flat Major /C Minor /F# Minor /G# Minor Also you can choose a Key signature for a melody with " - - " (-, -, ), "- ", "- ", or "=" symbols. The symbols "- " and "- ", allow you to choose the Root note and scale you want. It is also possible to play the Dictation of notes. The macro was made as easy as possible for beginning users, so there is no need to use the mouse to click on a key signature. It is enough just to push the space bar and press one of the keys listed below. The macro takes into account all musical scales and key signatures. When you click on a key signature, the current scale is displayed in the small panel. If you choose a scale that is not on the list of the ones you can

---

choose, the macro will automatically generate it.

**KEYMACRO Note:** This macro is a key signature for notation of all Western and Music scales. Using this macro, the note version, you can choose from nine types of key signatures. When you click on a key signature, the current scale is displayed in the small panel. If you choose a scale that is not on the list of the ones you can choose, the macro will automatically generate it.

**KEYMACRO Digital:** This macro allows you to create a custom digital key signature for any musical scale, even if it is not listed in the Macro Editor. To use this macro you need to generate the data for the Scale that you want to add a custom key signature. The scale can be found in the small panel. The option of hearing the scale before saving will be available. After generating the data you can copy and paste it to the Macro Editor for 1d6a3396d6
