
Smart Salon Manager Free X64

[Download](#)

Smart Salon Manager is a software solution for salon operation that allows you to create appointments, manage employees, customers, products, stock, record and track detailed sales and commission information. You can use all this information to create a detailed map of your business and keep track of your business development. The software can

also be integrated with web-based POS solutions like FreshPOS. Thanks to this technology, you can manage your business in a way that's more effective than ever before. By using real-time information to make more efficient, organized decisions, you can keep your business ahead of the pack. Designed specifically for salons, Smart Salon Manager allows you to make appointments for clients,

employees, vendors and yourself. It can import and export data to and from other applications and automatically balances the books to ensure profit margins stay above the industry average. You can also link your business information to your Favorite Clubs so your clients can view them on a single page. With this feature, you don't have to worry about any details of your business slipping through the cracks and

the possibility of misplacing a hard copy of invoices, receipts, minutes, cancelled checks, and other important documents. You can use the application to record Sales and Percentage Commissions for each product, service, or transaction, which eliminates the need for relying on pen and paper to keep track of such information. Smart Salon Manager can also be integrated with FreshPOS for the ultimate POS experience.

With less time spent managing your salon, you can perform more important business tasks and let technology take care of the rest. Data Import and Export
This software can export appointments, contacts, chemicals and other relevant information in a wide variety of formats, including PDF, Excel, HTML, RTF and more. It supports both text and binary file types. Customers Here's where you can keep track of

every single customer at your salon. You can use the application to schedule appointments and maintain a database of regular customers, so you can refer to them when they are ready to pay. The system can send reminders to your customers' phones so they don't miss their appointments.

Employees Smart Salon

Manager can track the hours worked by your employees. Use the software to enter their

names, their status, their availability and any special instructions. You can also assign them to tasks that you assign to them. Stock You can enter, calculate, update and delete stock at any time. This allows you to use the application to keep track of stock expiration dates, inventory levels
