Gameplay ELDEN RING game: Storyline ELDEN RING game: Gameplay ELDEN RING game: BOSS FIGHT Game system: ELDEN RING game System BOSS FIGHT game system: The game system that we have created is a Tactical RPG system with FATE and PHYSICS. You can direct fights and exchanges between heroes with ease. This system also features 'Reactive Deterrence'. Enemies that avoid damage from attack and defense will become monsters. When your enemies become monsters, they are more likely to be hit by other attacks, so the battles are not a static, stand-off situation. This means that you can handle various kinds of situations and attacks while moving freely and freely at any time. In this way, you can obtain various kinds of tactics by forming chains of attacks. High-level and high-skill is required to obtain skilled attacks. There are many battles and encounters in the game. However, you can choose which of them to fight on the same stage. BOSS FIGHTS: All of the enemies are "End Boss". If you win against an End Boss, you will be summoned to the next fight immediately. Therefore, you can fight in as many enemy attacks as you want by selecting a fight you want to enter. Battle modes: Single fight, Team battle Single fight: You can take on a single boss in a challenging fight. This mode of battle will allow for easier battles
