Part of the team is an experienced ex-Naval engineer. We tried to be a little more accurate to their military interests, but also a little more fun. We tried to make the player act like a person on Mars, rather than a typical soldier in the Game of Death. On Mars you should not only know how to shoot your weapon, you should also know how to build a shelter, defend yourself from the wild boars and deer, how to fix the basic equipment, the use of weaponry, what to explore, what to mine and what else? We hope to provide you a perfect sense of exploration and immersion, and have a lot of fun with this genre we introduced. You will have the opportunity to save the world and not only from foreign invaders! First and foremost, we hope to present you a new take on PC games in the strategy genre, and also a new approach to many unknown to us developers, a real pleasure to work! We hope that you will look forward to the final results. There are three main areas to compete: Explore the beautiful planet to find the hidden objects; Go to the co-op cooperative mode and stay with your partner, in this case you should act as a team in the search for an Earth a convenient object; Try to play in the story mode and jump into the story from the first to the last level of the game. The story mode offers you a lot of interesting stories, interviews with researchers, the history of the first attempts to find out who the invaders and, finally, to understand what really happens. We also hope to offer you a short, but consistent soundtrack. It's the music, which plays in the game in an immersion-inspiring way, according to your actions, hearing the unique atmosphere of the planet. References
