The game takes you to the world of Elven Legend. The main character has to use special skills, which he has to combine in many combinations in order to achieve success. Elven Legend is a game about tactics, use of resources, traps, combination of items, etc. The story of Elven Legend: Princess Aerin, who is the main character in the game, has been kidnapped by the evil witch. She left her city on a journey to discover the truth behind her parents death. She has found strange creatures which are living on the path, and terrible beasts which are roaming the woods. Her father's best friend, Blathir, has abandoned her. After 2 years, she reaches her destination. Then she sees the destroyed city, and her parents bodies covered with rags and dirt. Her mother's eyes are closed as if she is sleeping... The evil witch has kidnapped them both, taking control of their bodies. The witch has forced them to work for her for two years. They are still alive, but the witch has enchanted their bodies and their minds so that they can't think of escape. The witch calls them, "Slaves". There are only two ways to free them - either kill the witch, or die trying. A: The Kingdom is Megoria, which is mentioned in the question and in the screenshots. From Wikipedia: "Megoria is a kingdom in the fictional universe of the "Legend of Evermore" boardgame. Megoria is the most distant of the five islands in the Isle of Living. The kingdom of Megoria first appears in the first book in the series, "The Isle of Living and the Dead" by Jennie Williams. The first book ends with the elf princess Aerin reaching the kingdom, but she does not reach her home as the book ends. The magical Kingdom of Megoria was first described in the series by Jennie Williams. She describes the Isle of Living with a group of uninhabited islands and the surrounding ocean. Megoria is said to be on the other side of a special "doors of silence", which is broken by the presence of special creatures. There are five of them, which are Birdkind, and the fable of the Gods of Silence. Birdkind is half a bird and half a being. Because of this, they have divine powers that normal humans do not have

Futurejam is a new generation of game. With a few simple controls, you'll be up on stage playing the hexaSynth, a virtual instrument that was developed by the Futurejam Team. It works in the same way as the hexaSynth that we all know from the Dance Dance Revolution series of games. In the hexaSynth, you play the virtual keyboard, a 5-pad on the controller and your hands and feet to beat real-life house and trance music. Numerous stages and songs will keep you playing for hours. Each song will have varying shapes and sizes of buttons, meaning you'll have to be on your toes in a different way each time. Vivid lights, lasers and strobe effects will make this game very different from any other. Choose a difficulty level from easy to expert to really start getting your groove on.
