... -Come on! - he laughed, -I just got off work. I'm tired. I don't have a face on me. -But I have a sense of duty. - She reached up to kiss him. -You should rest too. You have to work tomorrow. -No, I don't want to. -You don't like this place? -No. -I do. But I don't like that you don't put me in charge of anything. -There's something you don't like. -No, I like everything. You just don't believe me. -I don't. -You don't believe that I feel good,-he felt her pull away,-I don't believe that you love me. -I do,-she said, -I believe that you are mine, that you are with me. And I believe that I am yours, too. And that you're my only one. -But what about your family? -They know about me. I told them. -And they forgave you? -I'm their daughter," she shrugged, "I have no right to do otherwise. And I can't be with you. We can't be together. -I don't want to be alone. I just can't be without you. -You can't. I know you can't. You're not like us. We love each other. And I'll go. -I'll be with you. -No. -No. You can't. -I won't wait for you to come home, and you have to stay out of the way of my life. -You can't just leave. -I'll wait. -I can't leave everything. -Why do I have to leave everything? -Because I choose to. -Why do I have to leave everything? -Because I choose to. -Å¶ 'Cause I've decided Å¶ -Why should I quit? -Why should I quit? -I can't do this anymore. I can't do this. I can't do it. -I have to wait for you to come back. I can't do it without you. -I have to go. -I have to wait. # I can't # # I must wait # -Å¶ go away, please go away Å¶ # Don't follow me, don't follow me # # I don't want to love again # I don't want to be with you Å¶ I don't want to be a passerby Å¶ I don't want you by my side. Please go away, please go away. â™ª Don't look up at my house â™ª â™ª I'll lock the door with a deadbolt â™ª And don't ring my doorbell, Don't come into my quiet house. Don't look for me, don't believe In the ghostly veil of hope. I don't want you by my side, Don't look for me with your eyes, And don't fall on your knees. How long have I lived in hope That you'd come someday And you have come, and here we are together, And you are silent, and I am silent. Standing there as if guilty of something, Waiting for the first word I'll say to you. But you say nothing and I say nothing. We're both waiting and we're both silent. # And only the winds are singing to us Of our pain, of our love And it seemed to us that for ever, We'll be together as we were before, But it didn't work, it didn't come true. It didn't work out, it didn't come true. # Stand in my arms like in a dream # And look away # And we're looking back Å¶ what's become of us Å¶ # We don't have time to look # â™ª We're... â™ª

Our machine had a x64 version of windows installed. When I switched to the x86 version, it worked fine. Windows system files are usually stored in "C:\Windows" (or something similar). When you start visual studio, the 32bit version of the compiler is used. It doesn't use system files from C:\Windows\SysWOW64. There is a file "x86_enU.cab" in the C:\Windows\Resources\English. 1023 files were skipped in x64 version. The x86 version have to be 32bit in order to run without problems. A novel X-linked immunodeficiency associated with recurrent bacterial meningitis. It has been suggested that immunodeficiency is often caused by defects in the Fc-gamma receptor II, CD16. In a cohort of 180 adults with immunodeficiency, 9 were found to have a variety of B cell immunodeficiencies, including X-linked agammaglobulinemia (XLA) or combined immunodeficiencies, i.e., B cell immunodeficiency/granulocyte immunodeficiency (B/G), all of which were associated with normal CD16 expression and variable CD3TCR expression on lymphocytes. However, in this study, we describe a patient with recurrent bacterial meningitis and normal CD16 expression that did not have a B/G or XLA phenotype but did have a novel X-linked immunodeficiency associated with a CD3TCR deficiency. The patient had a c6a93da74d
