[FSX] Overland Seoul Incheon International Airport RKSI

File Description:FS2002/2004 Incheon Intl Airport scenery the Winged City v1.0 is the most realistic freeware scenery of Incheon Intl Airport (RKSI) in Korea. RKSI is the largest airport in Korea and ranked sixth airport in handling cargo(2002). Also it is the first airport in Asia to earn the rating of the ILS CAT III-b operation.(Sep, 03) In my scenery there are... * Two runways (15R/33L, 15L, 33R) and VOR, ILS * Passenger Terminal and Cargo and Maintenance ramp, Taxiway * Control tower and 44 gates with boarding bridge * Shoreline of Yeongjong Island, Yongyu Island and around Islands and SRTM 3 arc-sec mesh scenery data around the airport. In this pack are the

airports of Incheon International Airport itself, along with Concourses A and B. The Concourses are the light blue and green areas of the airport, these are not the actual colors of either of the concourses but rather the colors used by the airports interior designers. The installation package is the same as all the Overland packages and includes: Airports, Terrain Base, Back-Camera and 10 textures/Lights. All airports included are in high quality textures and are the most recently updated. In this pack we have the new airport of Incheon International Airport, although not the newest version I have been working on a new version, but the one in this pack is the closest to completion, currently there is a missing runway and some work to be done on the taxiway and taxi sign layers.

Concourse A is updated, Concourse B is updated and Concourse C and Runway 31/34 are updated (for these concourses also runway 13/31 is updated). Lots of new textures with proper reflection in the concourse areas, runways and taxiways. All airports included are in high quality textures and are the most recently updated. 5ec8ef588b
